

VIVEK INDLEBELE NARASIMHA PRASAD

FOUNDER AND CTO | PRODUCT AND SOFTWARE ENGINEERING

San Francisco, CA | vivek@gamestock.app | linkedin.com/in/vivek-i-n | github.com/invivek26 | viveks.app

SUMMARY

Hands-on founder and software engineer building production systems across mobile, backend, payments, analytics, and release engineering. Co-founded two startups, scaled GameStock past 20K+ users, and maintains React Native packages with 16K+ cumulative npm downloads.

EXPERIENCE

GameStock | Founder and CTO

Aug 2025 - Present

San Francisco, CA | Fantasy stock and crypto tournament platform; raised a \$2M pre-seed round led by Peak XV Partners.

- Led product and engineering as GameStock grew past 20K+ users and 10.6K monthly active users, earning a 4.8/5 Google Play rating across 440+ reviews.
- Built tournament and live market systems behind 150K+ tracked tournament joins; reduced median transaction broadcast latency from 2.95 seconds to 0.9 seconds.
- Designed wallet and payment infrastructure supporting 2K+ transacting users and 16K+ completed payment events across funding, escrow, reconciliation, refunds, and payouts.
- Modernized mobile architecture across data, styling, and bundle delivery; cut Hermes bytecode 16%, module output 27%, and boot modules from 9,285 to 6,640.
- Established product analytics and release engineering with PostHog, AppsFlyer, Sentry, automated native and backend deployments, and 18 critical E2E flows; recent CI averaged 2.5 minutes with 95%+ success across 1K+ monthly runs.

Zen Shuttles | Founder and CTO

May 2022 - Dec 2023

Tempe, AZ | Campus ride-pooling startup serving Arizona State University; reached break-even within 15 months, secured \$31K across four ASU venture awards, and won first place at the ASU Tech Devils Pitch Showcase.

- Built and launched rider and driver mobile apps plus a real-time operations dashboard using React Native, React, Firebase, Stripe, and Google Cloud.
- Designed the dispatch and scheduling engine to group nearby demand, enforce vehicle capacity, and deliver routes and ETAs to drivers in real time.
- Reduced mapping API usage through autocomplete caching, session tokens, and removal of redundant route requests; also shipped memberships, payments, referrals, promotions, push messaging, and operating analytics.

SELECTED OPEN SOURCE

Creator and Maintainer | React Native and Expo

2026

- Published three packages with 16K+ cumulative npm downloads: Expo OneSignal Live Activities (10K+), React Native Number Animation (3K+), and React Native Marquee Animation (2.8K+).
- Automated end-to-end Expo and OneSignal Live Activity setup and built Fabric-native number and marquee animations in Swift/Core Animation and Kotlin/Canvas, keeping per-frame work off the JavaScript thread.

EDUCATION

Arizona State University

Dec 2025

M.S. in Computer Science

GPA 4.0/4.0

Arizona State University

Dec 2024

B.S. in Computer Science

GPA 4.0/4.0

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Swift, Kotlin, Python, SQL

Frameworks and platforms: React Native, Expo, React, TanStack, Node.js, Bun, Convex, Firebase, Google Cloud, Stripe

Delivery and analytics: PostHog, AppsFlyer, Sentry, GitHub Actions, EAS, Maestro, Turborepo
